## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The recitation "and having no terminal amino group" was not described in the specification as filed. This recitation expressly excludes a terminal amino group while implying the permissible inclusion of all other terminal groups. Thus this negative limitation introduces a new concept that was not present in the original disclosure. *See Ex parte Grasselli et al*, 231 USPQ 393 (Bd. Pat. App. & Int.).

The following distinctions are noted between the present case and the decisions cited by applicant. In *Kennecott Corp. v. Kyocera Int'l, Inc.*, evidence from a later filed application was presented to show that the term "equalized microstructure" was an inherent property of the claimed body of an earlier filed application. Applicant has not presented evidence that the concept of excluding terminal amino groups and permitting the inclusion of all other terminal groups was in possession of the inventors at the time the invention was filed.

The U.S. Court of Appeals Federal Circuit (*In re Wright* 9 USPQ2d 1649) determined that evidence contained in applicant's specification was convincing that the microcapsules were "not permanently fixed" to their supports. Applicant has not pointed to evidence in the specification that supports the concept of excluding terminal amino groups and permitting the inclusion of all other terminal groups.

As pointed out by applicant (*In re Voss* 194 USPQ 267 CCPA) the term "crystalline content ... at least 50% by weight" not literally disclosed was held to be described by literal disclosure of "glass-ceramic material" coupled with evidence that one skilled in the art would have attributed the recited crystalline content as inherent in that material. (emphasis added). Finally, evidence was also present in *Ex parte Parks*, (Bd. Pat. App. & Inter. 1993) in the form of declarations to support the conclusion that the reaction was "conducted in the absence of a catalyst". Applicant has not presented evidence to support the concept that exclusion of terminal amino groups and inclusion all other terminal groups was reasonably conveyed to one skilled art at the time the application was filed.

Applicant should note that if the above recitation "and having no terminal amino group" is canceled from the claims, the claims will be subject to the prior art rejection of record.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
